Javascript Algorithms and data structures

— July 2021

Udemy

MongoDB M001

— July 2021

MongoDB

## INTERESTS

I have a great interest in studying the world around me, particularly technology and how advances in technology affect the way humans interact with each other and the world around them.

I do this mainly through reading books by great authors, listening to podcasts and keeping up with news from the tech and financial sector as well as general current events.
